

# AIRS

## Audience Interactive Response System

Interactive two way communication between speaker/moderator and every single participant for Audience Response and participation, Polling, and Surveys.

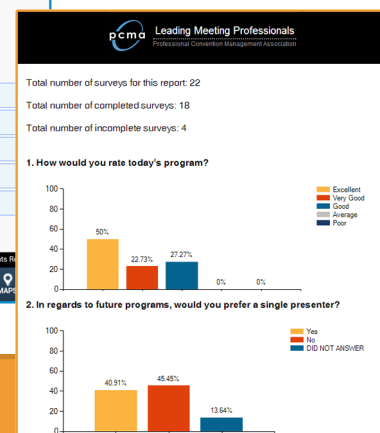

### FEATURES

- Questions can be pre-loaded using on-line Content Management System for every session including intermediate polling; variety of question types supported.
- Participants log in with own credentials in customized smart device app to answer.
- Audience survey results are shown in a variety of formats – table summary, bar graph or pie chart by Speaker / Moderator.
- Extensive reporting options with Content Management System
- Geo-fencing and participant validation accomplished through use of beacons in specific rooms.
